

Student Name:	Oran Mac Carthy Halpin	Video URL:	https://youtu.be/SYpcr3wXA2o
---------------	------------------------	------------	---

	CA-01	Attempted Yes/No?	Status and/or Description
Starter	Steps in Lab Completed	Yes	Completed
Baseline	Task 1 - New Combat Strategy Added with UI Selection	Yes	Completed, Emotional combat
Good	Task 1 - New Movement Strategy Added with UI Selection	Yes	Completed, Scared Movement
Excellent	Task 2 - AI Generated Automated Unit Tests for Lab Steps	Yes	Completed, Chatgpt prompt
Outstanding	Task 2 - AI Generated Automated Unit Tests for new strategies	Yes	Completed, Chatgpt prompt

	CA-02	Attempted Yes/No?	Status / Description
Starter	Steps in Lab Completed	Yes	Completed
Baseline & Good	Task 1 - One simulation, user chooses player and enemy strategies, custom or factory.	Yes	Completed, Chosen via a menu
Excellent & Outstanding	Task 2 - Coloured Log Output	Yes	Completed, Use the packaged colored

	CA-03	Attempted Yes/No?	Status and/or Description
Starter	Steps in Lab Completed	Yes	Completed
Baseline	Task1 - Guarded State Transitions	Yes	Completed, in a basic format for each state said
Good	Task 2 - Menu Driven State Behaviours	Yes	Completed, menu only implemented for player
Excellent	Task 3 - First New Design Pattern	Yes	Completed, Momento
Outstanding	Task 4 - Second New Design Pattern	No	No, too busy

	Tooling	Attempted Yes/No?	Status and/or Description
	Strong GitHub usage throughout with Branching and Pull Requests for each Task. Requested screen shots added to relevant pull requests.	Yes	Prs, branches, feature names, descriptive commits, screenshots featured in many merges.

AI Declaration

- It is **not permitted** to generate any GameWorld source code using AIs in this module.
- You **are permitted** to use AI to generate Unit Test Code.
- However, if, when using AIs for troubleshooting your source, blocks of code are supplied to you, and you use these full blocks of code, you need to clearly reference exactly what was taken from the AI in both your code base and the table below.

Game World Source Code Area	I have used AIs to generate code, when troubleshooting (Y/N)	Referenced in the code (Y/N)	Exact details of use (file name, function, etc)

Please note:

- If the trouble shooting is only amending one or two lines of code in a larger block of code that you hand-coded, you don't need to reference it in the code base or in this table.
- There can be no ambiguity around how you used AIs for code generation.
- There are no marks for AI generated code.
- Failure to clearly declare AI use for code generation could result in plagiarism charges.
